

HUMAN SERVICES DEPARTMENT[441]

Adopted and Filed

Rule making related to family support statewide database

The Human Services Department hereby amends Chapter 155, “Child Abuse Prevention Program,” Iowa Administrative Code.

Legal Authority for Rule Making

This rule making is adopted under the authority provided in Iowa Code section 235A.1.

State or Federal Law Implemented

This rule making implements, in whole or in part, Iowa Code section 235A.1.

Purpose and Summary

This amendment modifies language around the Department’s use of the Family Support Statewide Database, maintained by the Iowa Department of Public Health. The current rule requires the Department grantees to input participant data into the system. However, it does not authorize the Department to release the data to other state agencies, including the Iowa Department of Public Health. Under this rule making, the Department causes the Iowa Department of Public Health to access the participant data entered by Department grantees for the purposes of system quality assurance.

This amendment is necessary given the Department’s role as a covered entity under the Health Insurance Portability and Accountability Act (HIPAA), a law designed to protect patients’ medical and other health information records provided to health plans, doctors, hospitals and other health care providers. There will continue to be a memorandum of understanding with the Iowa Department of Public Health to address the privacy and security of the Department’s data and to outline the expectations of both parties, but this amendment will prevent the need for individual patient authorization.

Department services are not intended to be medical treatments. However, case records may include participants’ self-reported data about the family that could be classified as protected health information. For example, information about a child’s developmental screening results is often a part of a home visiting program’s record.
